B&W
Cases of Success

It's finally here - the BPS.S1 backpack system for case sizes PP.117 (type 3000) and PP.166 (type 4000)!

We have put our proven backpack system to the test and found out - there is still more in terms of functionality and ergonomics.

The new BPS.S-1 system convinces with comfortable padding, a weight-balancing position on the back and an adjustable chest strap. The system is rounded off by the attractive design.

Due to the fixed mounting by screws and hooks on the sides of the case, access to the outdoor case is not blocked and it can be easily opened at any time.

ACCESSORIES

FASTENING

To attach the backpack system to the case, holes for the screws must first be drilled in the side ribs of the case. Suitable drilling templates and screws are included in the delivery.

HOOK & LOOP FASTENERS

After the screws are attached to the case, loosen the hook-and-loop straps, attach the 4 hooks to the screw and pull the hook-and-loop straps tight.

*The shown case is not included in the delivery.
